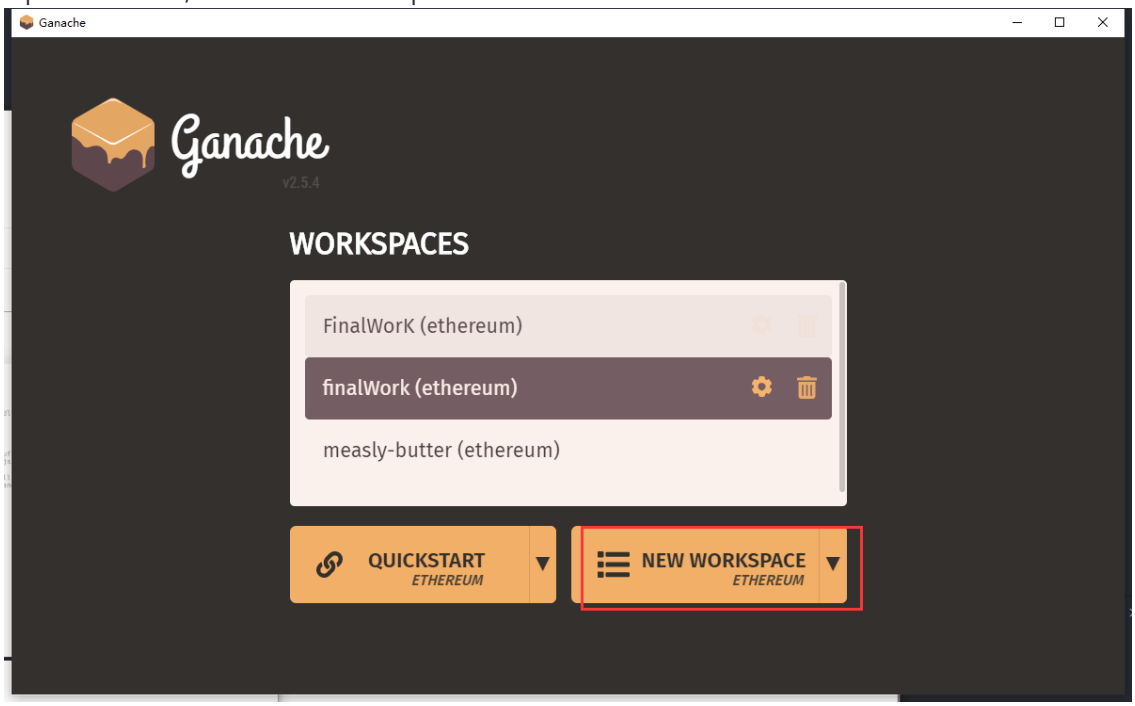
运行步骤：

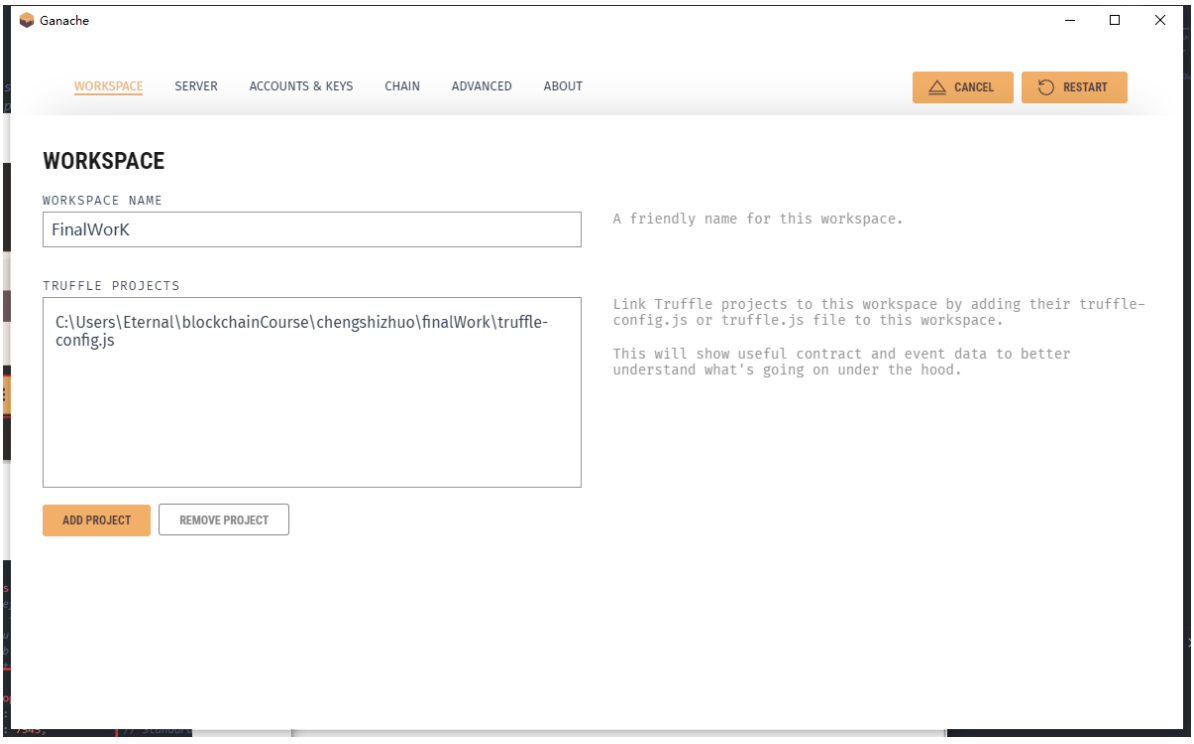
1. 部署链
2. 修改众筹管理器地址
3. 在crowdfund 目录下 yarn start运行

1 Chain Deploy

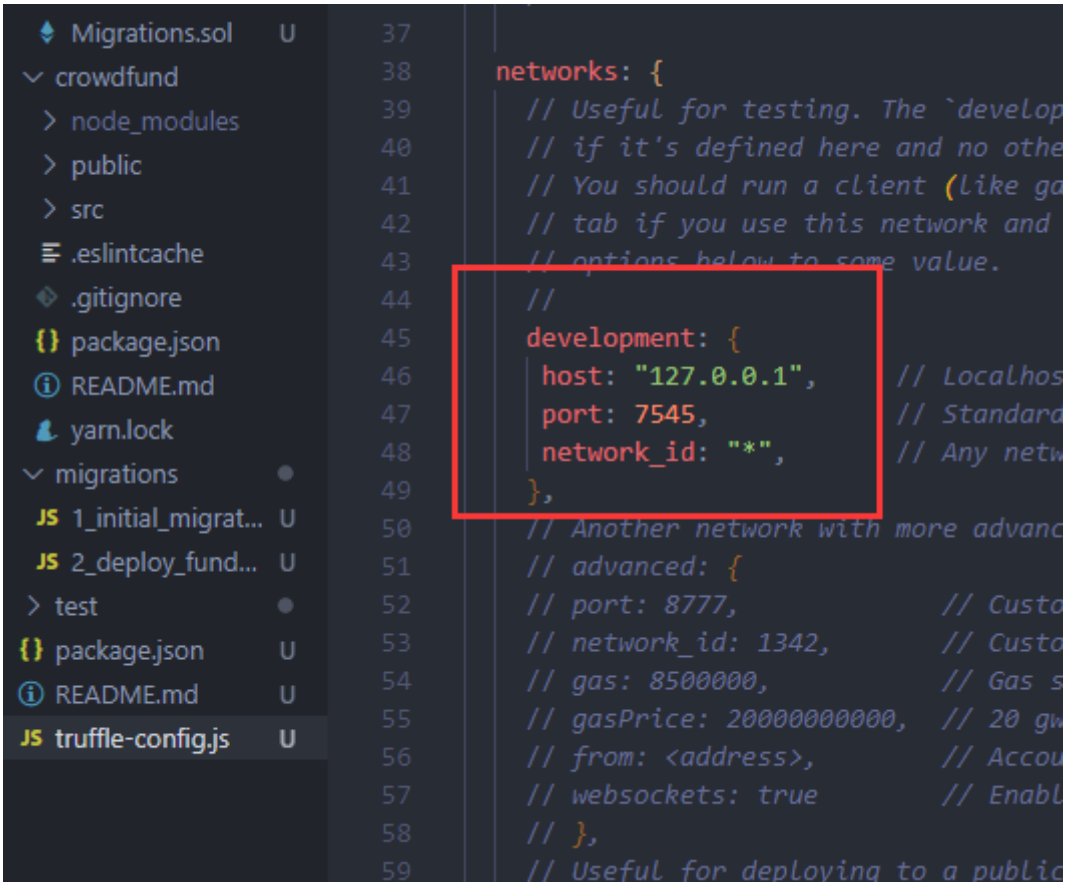
- Open Ganache, create new workspace



- Add project by truffle_config.js, rest as default

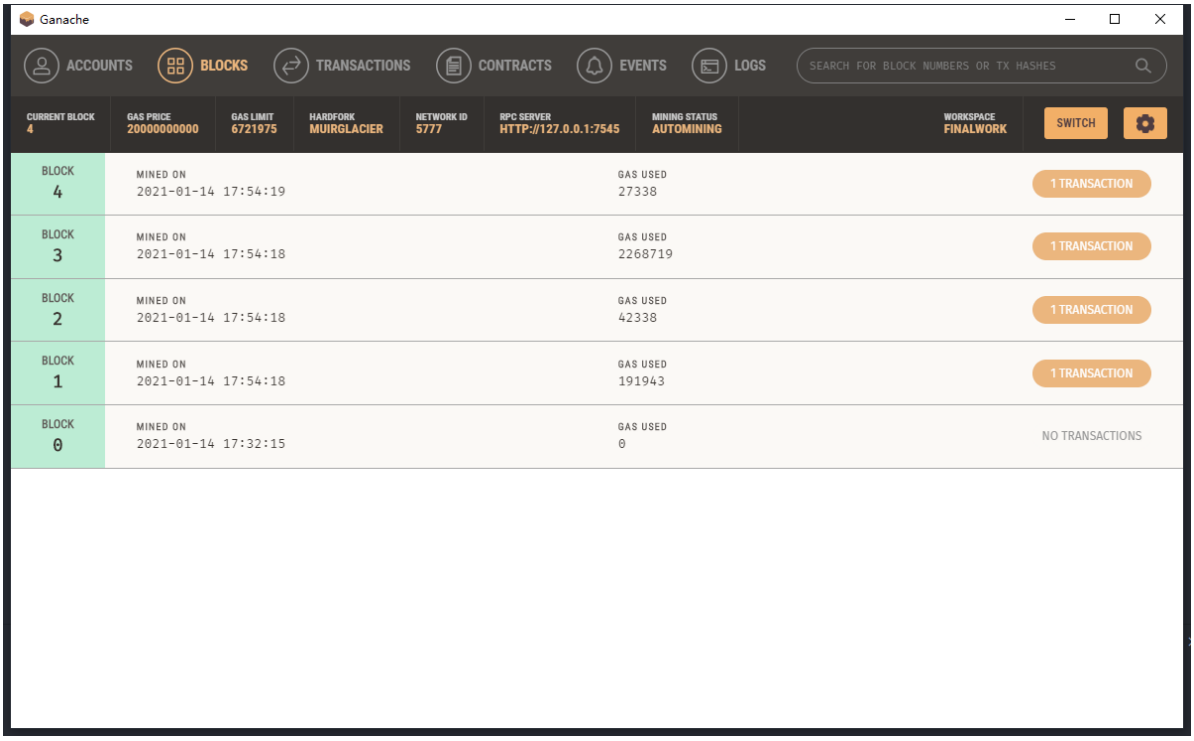


- modify the truffle-config.js



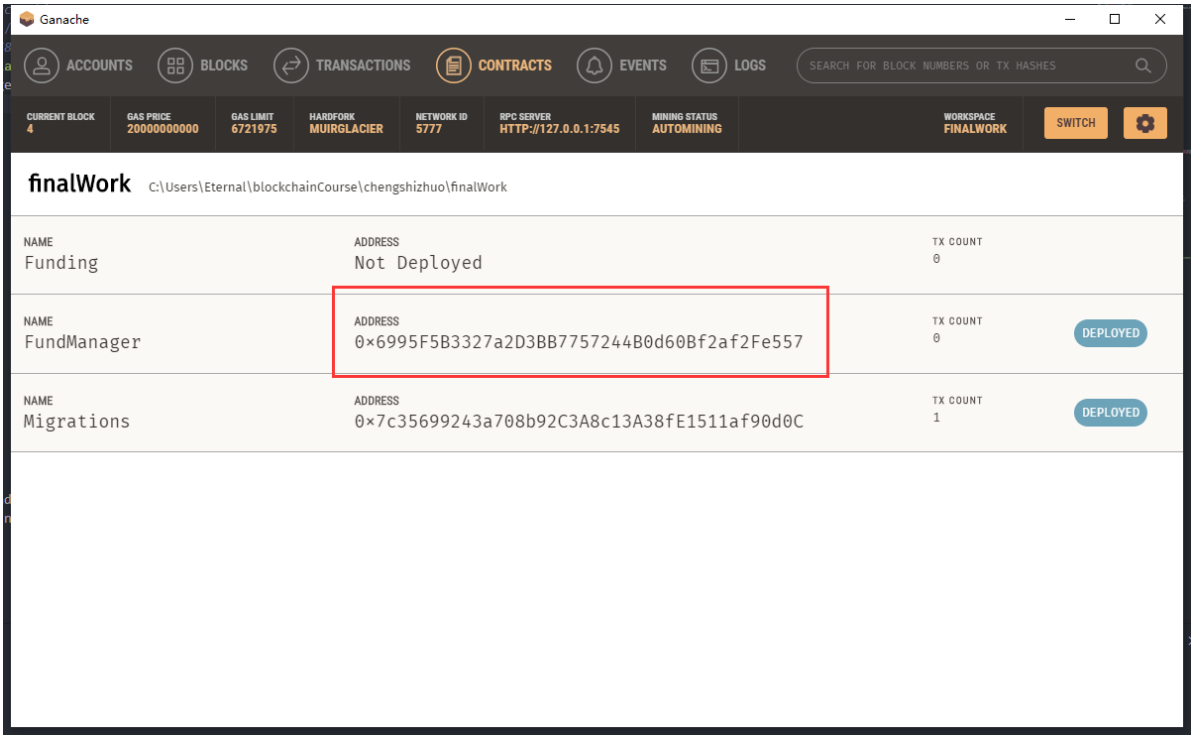
- compile and migrate

```
truffle compile
truffle migrate
```



2 Configure

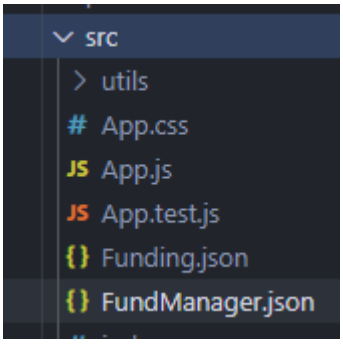
- Open Ganache and find the contract deployed. Copy the address



- Open `crowdfund\src\App.js` and modify managerAddr to the address

```
owdfund > src > JS App.js > ...
1   import React, { Component , useState } from 'react';
2   import './App.css';
3   import {GlobalTable, PersonalTable} from './utils/myUI';
4
5   let web3 = require('./utils/InitWeb3') //web3
6   var Funding = require('./Funding.json').abi  //contract abi
7   var fundManager = require('./FundManager.json').abi  //manager abi
8   // let managerAddr  = "0x10885457D3913f3C03d21C2042e3587cB259fBA5" //manager
9   let managerAddr = "0x6995F5B3327a2D3BB7757244B0d60Bf2af2Fe557" //manager a
10  let managerInstance = new web3.eth.Contract(fundManager, managerAddr)
```

- copy the `Funding.json` and `FundManager.json` to `./crowdfund/src`



3 Open The DApp

at ./crowdfund

```
yarn install
yarn start
```

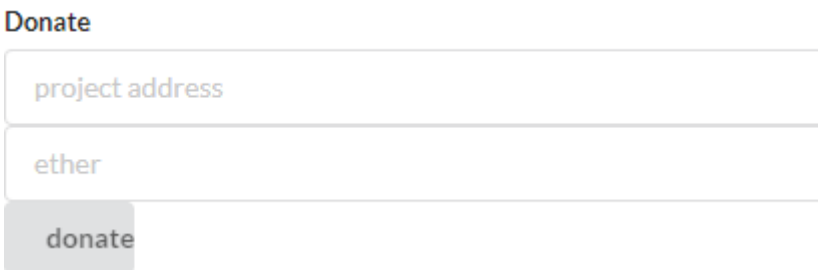
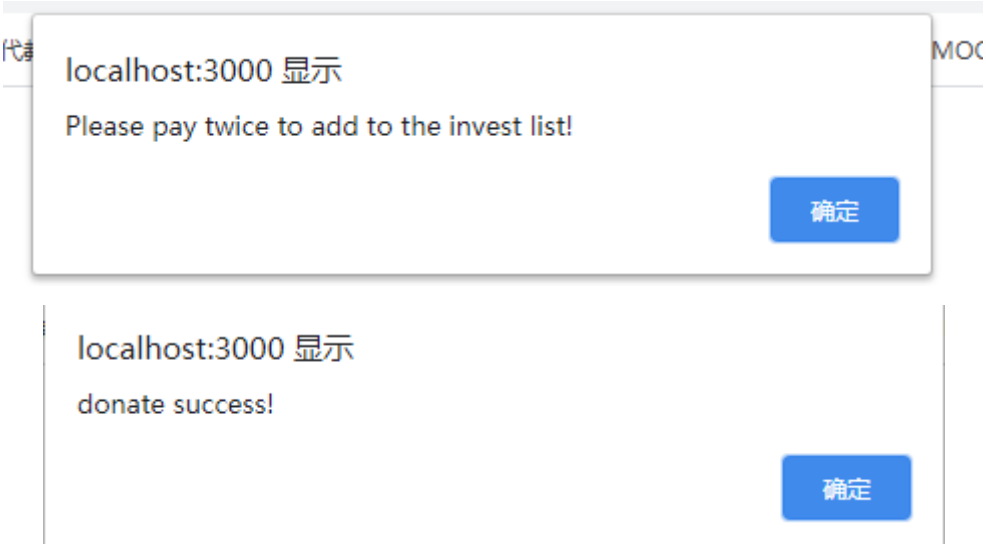
6 Donate

input the funding address and amount (ether)



you need to confirm twice to add the invest to the invest list. (only the first time will send value)



Note: the donate amount may exceed the amount but the vote weight total amount is the goal amount.

goal	got
30	31
30	20
30	31

e.g.

Goal: 20 ether

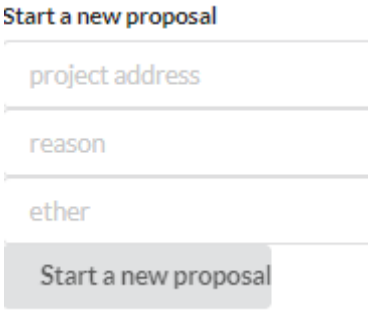
A donates 11 ether

B donates 11 ether

then no matter A and B votes, the proposal will immediately be over. (exceed 50%)

So which side will win is about what time you vote.

7 Raise a proposal



Similar to donate. Proposal will change the vote status:

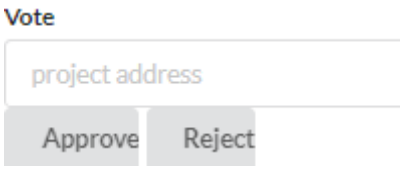
8 Vote for proposal



input the address.

When you are not a donator, error will occur.

The vote result will take effect when the weight of either side(Y/N) is passed 50% of goal Amount.

For one funding only one proposal will be going on at a time.
